## Monthly Meeting Program Our first in-person meeting: August BBQ!

by By Vice President Kevin Murdock

In the pre-COVID days, our July meetings were typically the lightest attended of the year. Our membership clearly wanted to be on the road over the 4th of July holiday. Accordingly, we would hang a 'gone fishing' sign on our monthly general meeting. That's what we're doing this July. Enjoy the holiday, go fishing. We'll reconvene with a special meeting in August. For our August meeting, we'll get together at a new location for our annual summer B-B-Q.

This year, we'll meet at 6:30 pm at the Sheriff's Posse House on the Ocean St extension in Santa Cruz. It's located about a half mile beyond the cemetery. Ample parking and outdoor seating come with the venue. The club will host a burger and hot-dog cookout with all the fixings. We'll also hold a fishing swap-meet/flea market. Bring your gently or un-used gear to the meeting for cash or trade. There is also a perfect field for casting demonstrations and competitions. Bring your favorite rod and cast for prizes.

This will be our first opportunity in what seems like forever to meet and greet in person. Please, if you are un-vaxed, wear a mask for your own protection.

## Monthly Raffle Future Raffle Goodies

Even though we have no meeting in July, I thought I would give a little tease of things to come in the way of raffle prizes. As you can see in the photo, it looks like I have the makings of small fly shop with all the prizes that I have stashed away; rods, reels, flies, nets, fly boxes and gear bags. On top of that, we've got the new John Gierach book, a Simms fish whistle, and a certificate for a Humble Heron guided fishing trip. Wow, lots of cool stuff.

The raffles will start up again with the September meeting both on-line and in-person at the actual meeting. Remember two things: the club really appreciates your support and to win, all you need to do is buy the lucky ticket.

#### Jeff

Questions, comments, or suggestions are always welcome. Jeffgoyert@gmail.com

# President's Line : *by Thomas Hogye* Let's Go Fly-Fishing!

Let's go fly-fishing!! Happy Summer everyone! I hope at this writing you're all making plans to get out and do some fly-fishing in the coming days or you're already gone doing just that. Send us some photos we can share with the world – info@santacruzflyfishing.com

While California is a bit short on water this year, that means flows are very manageable and fish are hungry. Mona and I had an epic adventure over the Memorial Day weekend and

are planning another trip around the Sierra Mountain streams in late July. Best way to spend our 30th Anniversary together. It was really surprising and fun to find miles and miles of dirt roads and off-road trails we were able to explore in our truck. Many of you have likely been to Crowley Lake, fly-fishing, but did you know there are incredible "columns" on the backside of the lake that make it look like you're in Greece? But access is literally a good mile and a half hike on trails. Fly Fishing Hot Creek is great, but have you also seen the geothermal hot springs? Have you ever seen the 3 mile long lava flow of some of the largest obsidian deposits just south of Mammoth? Chidago Canyon Gold Mines? Have you heard of Cerro Gordo – once the largest silver mine in California? The Alabama Hills and Movie Road? Haystack Mountain? (UH spoiler alert – there is no hay!) Climb Mt. Whitney? Come on people! Get out there!!

#### Kennedy Meadows/ HWY 108

If you're relatively new to fly-fishing, and love camping where it's not too remote, Mona and I have been enjoying the Middle Fork of the Stanislaus along Highway 108 for 30 years. Dry-fly and nymph fishing to both planted and wild fish is generally quite good. Most of the fish are in the 10" range, but some surprising large fish are there. The campgrounds along the river are easy to access and nice. Kennedy Meadows Pack station/resort is at the base of Sonora Pass and if you love exploring the mountains away from Yosemite, this is the place to do it. You can pack horses, do day trips, or hourly trail rides. Cabins, a store, restaurant and saloon are all favorites of many for decades. The pass rises from 6,300 feet to over 10,000 feet in 9 miles. If anyone is interested in hanging out with us at Kennedy Meadows in late July – let me know. Fly-fishing the meadow all day is second to nothing.

#### August BBQ and Swap Meet – Sherriff's Posse Hall – Ocean Street Extension

August will be our first physical gathering since March of 2020. It is our August BBQ and Swap Meeting. It will be held at the Santa Cruz Sherriff's Posse Hall on Ocean Street extension. It's an awesome outdoor country venue. Hot dogs, burgers, Beans, Potato Salad and who knows what else! Remember, if you bring something to the swap meet, please be prepared to take it home if someone doesn't want it. I'm particularly excited because we have been blessed with so many new members who have never experienced a physical club meeting yet. While this won't be like our general meeting, it is surely something to look forward to as we start getting together again. September meeting we're hoping to have at the Grange Hall. More details in your newsletter to come.

#### Thank you.

Special shout out to David South and Bob Peterson for the excellent work handing out scholarships at the high-schools this year. There is interest in making these scholarships larger in dollar amounts. If you'd like to participate for next year, let us know. We'd love to do more for the students, the future of our sport and this planet.

Thank you to Jerry McKeon, Scott Kitayama, and Carly Blanchard for the terrific work on the website, Instagram, Facebook page, and the Club Roster, it has helped us stay so connected and active in the very best way. It was so nice to hear guest speakers say how awesome our club is, how funny we are, engaged, and how many people have been making the Zoom meetings -38 last month for Brian O'Keefe's presentation on photographing fish, wild-life, ... Really amazing. He will be back next year for sure.

Thank you, Elaine and all your guest Fly-Tiers, helping us get through quite a year navigating Zoom and getting fly-tying materials to everyone.

Jeff Goyert and Micheal McGannon for putting together the most awesome and engaging raffle items and SCFF merch to buy – and more to come!

Steve Rudzinski, thank you for going out of your way with the Jade Street Park casting fun and Sam Bishop, for helping with that and so many fish-outs close to home.

Thanks to everyone of you on the board, members, guests and those who support the membership, our goals, objectives, who helped us thrive during these most interesting times. I would not have been able to do this without each and every one of you.

I look forward to finally seeing all of you again, in person. But if I miss you this time – it's

because we're fishing!!

# Fly Tying Class Window Tint Chironomid

by Guest Instructor - Matt Twisselman

This fly utilizes automotive window tint film for the body. It is easy to tie and an important fly to have when fishing stillwater.

Note: The class is on July 14, if you contact matt early, he can mail it to you or pick it up at Matt's house in Scott's Valley. Matt's cell phone is 831-419-7333 or send your address for mailing to Twissfile@gmail.com.

**Date:** July 14, 2021 **Time:** 6:30 pm **Place:** Zoom

# Balanced Leech – August fly tying class

#### by Jerry McKeon

At first glance this fly looks like your typical wooly bugger but it's not. It's tied in a way that allows it to hang in the water column in a horizontal plane or balanced. Hung under an indicator in choppy water the fly pulses and swims the way a baitfish or leech does. Professional fly anglers like Phil Rowley and Brian Chan are big advocates for this pattern on still waters for trout and I'll vouch for it as a great bass pond fly. The body of this fly is created using a dubbing loop so some kind of dubbing whirl

tool is needed. Dubbing looped bodies are also very effective for nymphs and other streamers so this is a good technique to know. If you need more info, check out this video with options for dubbing whirls:

#### Class is 8/11/21 @6:30PM on Zoom.

**Please email metropolitantrout@gmail.com by 7/29** and include your address so I can mail you the materials. The days leading up to the class I will be out of town and unavailable to reach which is why I'm asking for the early RSVP.

## Fly of the Month Iris Caddis

by Elaine Cook----fly tying chairman

This emerging caddis is fished in the surface film using a floating line. Apply floatent to the loop wing only.

Hook: TMC 100 sizes 14-18

Thread: tan 8/0

Shuck: Amber Z-Lon or spooled Antron

Body: tan Hairtron or Hairline dubbing

Wing: white Z-Lon or Antron

Thorax: same as body AND dubbing wax

Head: thread

1. Crimp Barb.

2. Apply thread 1/3 back on shank.

3. Separate strand of shuck material in half. Tie to top of shank from tie-in to a little around bend of hook. Cut length equal to 1/2 hook shank long.

4. Dub a generous body up to tie in. Brush backward a little to make rough.

5. Tie in wing material on your side of shank. Form a loop that extends to rear of shank. Tie in on far side of shank at original tie in location. Cut excess. Wrap down butts.

6. Apply dubbing wax to a couple inches of thread. Using touch method, apply small amounts of dubbing to thread. Wrap a generous, shaggy thorax forward to hook eye. Wet fingers, pull forward dubbing backward. Make several thread wraps forming a head. Whip finish, cut thread. Brush thorax fibers back a little forming a shaggy fly.

## Conservation Concerns Lahontan trout stocking in Lake Tahoe

by Steve Rudzinski

Our first two stockings of the 2021 season in Lake Tahoe are complete! This week we stocked 5,083 10 inch Pilot Peak Lahontan Cutthroat Trout on the Nevada side. To monitor and evaluate Pilot Peak LCT growth, survival, and movement around the Lake, 30% of those trout were FLOY tagged with a unique ID and phone number so that anglers can report their catch and help us collect this vital information. Thank you to the Washoe Tribe of California and Nevada, Nevada

Department of Wildlife, Tahoe Regional Planning Agency and the U.S. Forest Service-Lake Tahoe Basin Management Unit for the ongoing collaboration in providing a native trout for recreational angling opportunities in Lake Tahoe.

#### **Fun Facts:**

-Lahontan Cutthroat Trout are the only trout native to Lake Tahoe.

-Lahontan Cutthroat Trout is the state fish of Nevada.

-Lahontan Cutthroat Trout are the Largest inland cutthroat trout in the world.

# 17 Million Chinook Salmon Release In California Bays Planned

by Conservation Contributor Bob Garbarino

It is estimated that up to 95% of wild salmon habitat has been wiped out by damming of rivers in California. Hatcheries have helped make up for the impact of dams. Now amid the ongoing drought, the California Department of Fish and Wildlife has launched a program to release 17 million Chinook Salmon smolt into San Francisco Bay and others—including Monterey Bay. The fish are being loaded in trucks from hatcheries and transported to the bay and released. Historically, the fish

have been released into rivers and streams. But, with drought-induced low flows coupled with warmer temperatures, the survival rate is extremely low. The hope is that more fish will have a better survival rate (estimated to be about 80%) which could provide some support for the \$900 million commercial and sport salmon fishing business in the state. For more information, check out video in the online article.

# After 10 years of Decline The Klamath River Headed for Recovery

by Mark Rockwell, President, NCCFFI

The Klamath River was once the third most productive salmon & steelhead river in the lower 48, but more than 100 years ago four dams were built on it that blocked 250+ miles of spawning & rearing habitat. The license to operate those dams has now been transferred from PacifiCorp, a subsidiary of Berkshire-Hathaway, to the Klamath River Renewal Corporation (KRRC) and the states of Oregon & California.

The license will transfer solely to KRRC later in 2021, and dam removal work will begin in the summer of 2022. The Kiewit Corporation will start decommissioning in January 2023, with all four dams removed by Fall 2023. Resource Environmental Solutions will implement & monitor restoration work after removal.

The Northern California Council of Fly Fishers International participated in early Klamath discussions in 2003; in 2004 Tribes, State & Federal agencies and other NGO parties joined the formal negotiations that will culminate in new spawning & rearing habitat and a healthy river.

## Membership Notes 2021 Membership Rosters available

by 2021 Membership Rosters available

Membership Rosters are now available by email request, or can be picked up on August 4th at the Sherriff Posse BBQ first monthly meeting of the year @ 1227 Ocean St Ext. Should you not be able to attend, or would like an electronic version, please send me an email @ robert6367@aol.com. I would also like to thank Carly Blanchard for her technical assistance in formatting the Roster for final printing by Community Printing.

# Beginner's Roll Cast Instruction - by Mark Traugott

Image from https://riverbum.com/blog/intro-to-fly-fishing-casting-with-the-roll-cast/

Beginner and novice fly casters who are interested in instruction in the roll cast, one of two foundational techniques in fly casting, should plan on attending a lesson that will take place in **Boulder Creek at 10 AM on Wednesday, July 28**. If you would like to participate, please contact me at 831-338-6056 or via email at traugott@ucsc.edu so that I can sign you up, give you directions, and discuss any equipment issues. The plan for July is for one hour of systematic group instruction followed by an additional hour of general practice and socializing. I am presuming that most participants will have their own rod, reel, and floating line. (A loaner rod or two may be available for those who do not have their own.) If there is sufficient interest, we could follow up in August with a similar session devoted to the "Pick-up and Lay-down" or basic overhead cast. More specialized techniques for experienced casters could become the focus of future sessions. It all depends on the level of member interest, so don't hesitate to get in touch and let me know if you would like to participate.

Thank You letters from scholarship recipients

Gillian Healey is from Aptos High

Hey Fly Fishermans Club! My name is Gillion Healey and I am the recipient of your scholarship for this year. I just wanted to write you a quick thank you! My ded used to be a member so it was extra exciting to get the letter. You may already know but I will be attending the local community college and taking classes to work towards a degree in Environmetal Engineering. That is the plan for now! Thank you, Gillian Dear Santa Cruz Fly Fishermen, Thank you so much for awarding me your Scholarship. I appreciate your support to further my education at the Iniversity of Hawaii Manoa. Sincerely Mava Gip

Maya Gipson graduated from San Lorenzo High

## Gearing Up Manresa State Beach Surf Fishing July 3, 2021

by Fishmaster - Mark Traugott, 831-338-6056

The July Surf Fishout will take place at **Manresa State Beach**, on Saturday, July 3rd. The sun will rise at 5:53 a.m., and the tide will be high at 6:54 A.M. We will meet at 5:45 A.M. at the entrance to the State Park at 1445 San Andreas Road. Park outside and just past the park entrance

where there is space for a half dozen cars. There are a couple more spaces on the opposite side of the street. If all the available spaces are full when you arrive, go a quarter mile further along San Andres Rd. and turn right onto Oceanview Drive. Park at the end of that street, along the fence on the right, and take the stairs down to the beach where you can eventually join the rest of the group. For details regarding equipment and technique, check the excellent instructions on surf fishing that Sam Bishop has published on our club website. The basic equipment is a

five- to 8-weight rod with an intermediate to full-sinking line or sinking tip. Any type of Clouser pattern or anchovy fly will work for stripers, and small bonefish patterns (for example, Gotchas) will catch perch, especially if they have red or orange highlights. The only surf-specific piece of essential equipment is a stripping basket, which Sam makes and sells for \$20 to benefit the club. Make contact with him in advance, or let me know if you would like to borrow or purchase a stripping basic on July 3.

## Gearing Up Alaska Trip

Roy Gunter is sponsoring a fishout to the Kenai Peninsula in Alaska leaving on September 4, 2021 and returning on September 12, 2021. Limited to 4 participants including Roy.

Please contact Roy to see if there are any spaces left. Additonal information is in the May and June Newsletter. Roy Gunter 831 809 0316 <u>rgunteriii@yahoo</u> .com email is best.

## Gearing Up Mammoth Fishout

by John Cook fishmaster-- (831)688-1561 or (831)234-6515

**Dates**: This fishout will take place over two consecutive one-week periods. You may sign up for one or both weeks. Week 1: Sept 18 - 25. Week 2: Sept 26 - Oct 2.

If interested, please contact John cook to see if there are anyspots left in the first week.

## Gone Fishing

# The Registers enjoying the Trinity Alps

We just finished up a week at Coffee Creek in the Trinity Alps. Mostly rainbow planters in the creeks, unless you hike in deeper. Then it is the occasional 8inch rainbow or brook. On a 100F day, the family traveled up to Kangaroo Lake (6,000ft) with our float tubes and raft. Again, mostly planters, but about 20 degrees cooler at that elevation. Here is a picture of some of the family heading out into Kangaroo with their gear. Kangaroo is in the middle of nowhere, but it is handicap accessible.

John & Kim Register

# Wild surf and fun fishing!

by Sam Bishop, Surf "Fishmaster"

Dateline 5 June 2021, 0530 hours:

It was a wild surf this morning at Palm Beach! 11 loyal members showed up at dawn ready to do battle with the wild surf, sea lions and barred perch. Their skills produced 20 - 25 or so barred perch. A rather large sea lion patrolled the area regularly and I suspect that is why no one caught a Striper. Next month we fish Manresa.

Our group: Judy Johnson, Aaron Reisman, Todd Goudberg, Jeff Gose, Mark Traugott, Robert Eberle, John Davis, Joe Clark, Sean Hyslop, Kirk Mathew and yours truly, Sam Bishop

### **Reel News**

# Northern CA Council, Fly Fishers Intl. July 2021 Report

#### by Mark Rockwell, FFI President

Greetings to all and I'm glad to say that we are continuing to see COVID cases diminish in most of our region. I am hearing that many of our clubs are again holding fishing retreats and scheduling in-person club meetings. This is all good!

#### NCCFFI is working for the future of Fly Fishing

- **Developing a stronger connection with our clubs** to improve relationships, communication & better protect our watersheds through conservation.
- **Improving and re-modeling our website.** Our goal is to have a good looking & informative website that has club activity information, conservation actions, educational opportunities & more. We hope to have the site up by early July.
- Strategy group working on goals & objectives for the next 3-5 years. We will be working over the next several weeks to develop a vision and working set of actions to meet the needs of our clubs, members and our fly fishing community. We expect this to take a couple of months, but it will put us on the road to stability and being able to continue to build the fly fishing community we know is important to the future.
- Things to look forward to: Better club support for your projects; Enhanced support for fly fishing by the Council by our work at the ISE show & Fly Fishing Show; Continued Councilclub communications; enhanced connection with FFI programs and events; Better learning opportunities for all through Council level education programs.

#### Fly Fishers International (FFI) – Working for our Sport & it's members

- **New Website** The website is now easier to navigate, full of helpful and interesting information and much better looking. <u>https://www.flyfishersinternational.org</u>
- New Learning Center Format: Click on "LEARN" at the top of the homepage, or go to: <u>https://www.flyfishersinternational.org/Learn/Learning-Center-Resources#</u>. Spend some time going through this section so you can see how it is a great resource for you and your club.
- New Virtual Expo November 5-7, 2021 enjoy all FFI has to offer from home on your computer! This appears to be a new & exciting way to enjoy your organization, yet learn and support your sport. <u>https://www.flyfishersinternational.org/Virtual-Expo</u> This promises to be a great event that is full of information & opportunity.

#### Women Connect – Within NCCFFI & FFI

• Link to Women Connect at FFI: <u>https://www.flyfishersinternational.org/Get-</u> <u>Involved/FFI-Women-Connect</u>. This is an expanding part of fly fishing as women are the fastest growing group in our sport. This is the place to get connected and get involved. • NCCFFI & Women Connect: We have a local group of Women Connect, and our Council is proud to say Anne Marie Bakker, <u>ambconsulting@sbcglobal.net</u>, is our Council connection. Contact her to find out more and join.

It's important to understand that both NCCFFI and FFI are working hard to help our sport on many fronts. FFI is the only organization we have that is only focused on fly fishing and All fish in all waters. Being a member means you support fly fishing and its future. **Join** today: https://www.flyfishersinternational.org/Join-Renew
